

Biochemistry Seminar

Specification of fission yeast actomyosin structures by tropomyosin

Fission yeast actin structures: Co-localization of the actomyosin ring that drives cytokinesis (green) and actin patches that promote endocytosis (red).

Matthew Lord

Assistant Professor

Department of Molecular Physiology
and Biophysics

University of Vermont

Thursday, November 19, 2009

10:30 a.m.

Sahai Seminar Room, 2117 MERF

Host: Peter Rubenstein

Individuals with disabilities are encouraged to attend all University of Iowa-sponsored events. If you are a person with a disability who requires an accommodation in order to attend this program, please contact the Biochemistry Department in advance at 335-7932 or email biochem@uiowa.edu.
